

Massachusetts Institute of Technology Sloan School of Management

FACULTY POSITION IN SUSTAINABILITY

The MIT Sloan School of Management invites applications for a tenure-track faculty position in sustainability, to begin **July 2011**. The successful candidate will play a central role in MIT Sloan's Sustainability Initiative, teach courses in sustainability, and carry out research in sustainability (see <http://mitsloan.mit.edu/sustainability>). Sustainability at MIT Sloan is defined broadly to include environmental, economic, political, social and personal issues, and we stress the interdependency and complex dynamics of these dimensions. We encourage applications from individuals engaged in research involving any aspect of sustainability, including the design, implementation, and evaluation of practices and policies promoting sustainability in business and other organizations, in government and international policy, in communities, and in interactions of these organizations. We encourage candidates whose research examines how organizations, markets and communities can become more sustainable, including the dynamics of implementation and diffusion of sustainable practices, organizational learning and adaptation, and the interactions of markets, firms, government, the public and other organizations.

Candidates can have disciplinary training in any area, including the social and behavioral sciences, management sciences, economics and finance, or other field. Applicants whose substantive research interests are interdisciplinary are particularly invited to apply. The successful candidate can be affiliated with any of the faculty groups at MIT Sloan. We especially want to identify qualified female and minority candidates for consideration in this position.

Applicants should possess a PhD in a relevant field by the date of appointment. Applicants must submit their 1) up-to-date curriculum vitae, 2) relevant information about teaching as well as research experience and performance, and 3) three letters of recommendation by **November 1, 2010**. If papers are available, please provide electronic copies.
